This is the Van Wert Area Two Meter Emergency and Traffic Net. We meet every Saturday morning at 10:30 am local time. This net is organized for the purpose of practicing net operations for emergency preparedness, handling traffic, net announcements and general information of interest to all amateurs. Net control will control the net and dispatch traffic by recognized outlets. Procedures governing a controlled net are in effect. Your net control is (YOUR CALL). My name is (YOUR NAME).

Is there any emergency or priority traffic? If so, please call net control at this time.

Are there any mobile stations or stations on short time wishing to check in, please call net control.

At this time, all other stations wishing to check in please call (YOUR CALL).

This concludes the net business as I have it listed. I wish to thank all of you that checked in and invite you to join us next Saturday morning at the same time. The net control will be (NEXT ON THE LIST). This is (YOUR CALL) net control closing the net at (LOCAL TIME). We now turn this frequency back to normal amateur use. Thank you and good morning.
